Praanas, Divine-Links, & Auras Volume II-Ashok Kumar Datta 2013-08 This treatise will reveal subtle secrets regarding subtle-elements, which pertain to breathing system (Praanaayaama), human speech (Mantras) and the external environment (Vaatstu-Science). The subtle-elements comprise subtle phenomena and the related spiritual, cosmic, semi-cosmic and semi-gross objects, processes and systems. Therefore, this spiritual knowledge will ensure healthy ecology; high spiritual elevation and high quality of life on the earth (i.e. sound health, prosperity and happiness). It may also commence a spiritual movement globally, which will effectively prevent global warming. The Indian cosmic philosophy, which pertains to internal and external environments, is termed as Darshana-Shaastra. This term reveals a secret regarding the Rishis of the Vedic era that they used to envision subtle phenomena through their cosmic powers. Subsequently, they developed applicable rules regarding Praanaaayaama, Sanskrit grammar, Mantras and Vaastu-Science. However, the spiritual-knowledge regarding
the subtle elements was lost along with them. The author has 'rediscovered the lost divine-knowledge' through his cosmic powers and the clarifications from his spiritual guides. They are astral beings now, because they were renowned Rishis of the Vedic era. One of them assumed 'human-form' to bless him with cosmic powers. This book is based on the extrasensory perceptions of the author. Volume-II: Cosmic and sub-cosmic dances of Vibhootis, the pairs of opposites, which procreate subtle and atomic particles; fundamental principles regarding subtle elements and external cosmic energy system; cosmic image of Vaastu-Purusha and flow-patterns of subtle energies in dwellings, the basis of Vaastu-Science; illustrative layouts of dwellings, including group-housing, commercial and industrial complexes; etc.

energies. Being a fully illustrated book, with around 100 simple, clear and easy to interpret drawings; the book is very accessible to a general audience and does not require any background knowledge in architectural design. Also included are two complete floor plans that can be tailored for specific individuals in accordance with their birth stars. Many other books about Vastu do not include an explanation of the technical knowledge of Vastu science, and if they do, they often present only a partial, or an altogether incorrect account thereof. This is not the case with 'Vastu Architecture', as its technically rich, yet layman-accessible knowledge base provides the reader with all of the basic requirements to create a Vastu structure, including a very clear chapter on how to use the Ayadi Calculations to get the Sacred Dimensions of a building. This is not however a coffee table book, it is rather a manual for the construction of special havens for the soul.

**Sahasra Mahavaastu**

Dr N H Sahasrabudhe 2019-03-13

Sahasra Mahavaastu tries to evolve a system of Vaastushastra that is concurrent with tradition and does not contain any false, pseudo and use of silly practices that mislead its followers. Vaastu, Yoga, Jyotish (astrology), Sangeet (music) and Ayurveda (ancient Indian medicine) are five sub-branches of oriental science. In modern science the subject of dynamics is explained on the basis of three terms -- rhythm, synchronicity and frequency. This book discusses these as well as the divine subject of Vaastushastra with the tools of planet-element-deity-direction-energy. The purpose of this book is to alert followers to protect themselves by avoiding false and pseudo practices that are prevalent in the present times. An attempt has been made to make this book a guide so that even a common man will be able to apply the basic remedial measures to protect the self. The author attempts to present Sahasra Mahavaastu as a revolutionary movement in the field of Vaastushastra, to propagate an ancient oriental thought in a modern language of the present world.

**Eco-architecture III**

Santiago Hernández 2010-03-16

This book contains most of the papers presented in the Eco-Architecture 2010 conference, which was the third edition of the International Conference on Harmonisation between Architecture and Nature. Previous editions, that were very successful were held previously in the New Forest,
UK, in 2006 and the Algarve, Portugal in 2008 and demonstrated the importance of a forum like this to discuss the characteristics and challenges of such architectural vision. Eco-Architecture implies a new approach to the design process intended to harmonise its products with nature. This involves ideas such as minimum use of energy at each stage of the building process, taking into account the amount required during the extraction and transportation of materials, their fabrication, assembly, building erection, maintenance and eventual future recycling. Presentations in the conference were related to topics like building technologies, design by passive systems, design with nature, ecological and cultural sensitivity, life cycle assessment, quantifying sustainability in architecture, resources and rehabilitation, and issues from education, research and practice. Case studies from different places around the world were also presented.
